

MOTHER JONES TO SPEAK TO MINERS

At Watson Tomorrow After Parade to Honor Soldiers.

Labor's honor to the returned soldiers, who fought in the World War, will be manifest in a parade to be held tomorrow at Watson and this city under the auspices of the United Mine Workers of America. For more than a month the United Mine Workers have been planning this event. It is an honor or tribute to all returned Sammys, whether affiliated with trades unions or not. The indications are that there will be a large turnout of marchers and the citizens are urged to cooperate. Some of these bodies may parade in the afternoon in this city.

The parade will start at 9:30 o'clock in the morning. The bodies will meet at Fairmont avenue and Twelfth street and march over town and thence to Watson. At the meeting to follow in the grove near Watson the principal speaker will be Mother Jones. Other speakers will be C. F. Keeney, Keeney, Charleston, president of District 17, United Mine Workers; S. E. Launer, Charleston, an international member of the Paper and Sulphite Workers, and probably Harold W. Houston, Charleston, attorney of the United Mine Workers of America.

In the parade the United Mine Workers hoped to have many returned soldiers as well as a good sized representation of Civil War veterans. W. M. Rogers, Fairmont, president of the State Federation of Labor, will head the parade.

Three bands of music will be line including the Moose band of Fairmont, the Mannington band, which will head the miners' delegation from Jamison 7, 8 and 9, and the Clarksburg band, which has been engaged by a number of United Mine Workers' locals of Harrison county.

A HOT SPOT Chalmers is a nimble creature of steel

AFTER you've had one ride in a Hot Spot Chalmers you'll wonder how it is possible to put so much action, so much eagerness, so much desire-to-go in a car-and-a-half of steel.

Take the engine out of the chassis and you have a car more or less like many others.

Put in the engine, and you have all the difference in the world.

For this great engine of the present Chalmers (medium sized though it be) has a way of making gas perform as no other engine ever has done.

The reason why is Hot Spot. Which "pulverizes" gas into a very "dry" state. This "dry" gas is then passed on to the cylinders via Ram's-horn and when those six spark plugs ignite the fuel there's action deluxe.

Hence you find a certain, indefinable nimbleness to a Chalmers that is tempting whether you're a front seat or a rear seat driver.

Don't be old-fashioned about a car. See the new day Chalmers.
